PROFESSIONAL PRODUCT FOR D-I-Y

Umbrella is a professional product developed on the experience of Atriafloor, the renowned resin flooring system by Atria. Ideal for D-I-Y, it is simple to apply with some basic rules for perfect application. First of all, the surface on which the product is applied must be perfectly clean. The presence of dust or otherwise can compromise the hold of Umbrella resin on the support, guaranteed by applying Umbrella Primer.

The gloss version of Umbrella will not alter the colour of the floor underneath, but makes it glossy, like new.

The application of Umbrella Non-Slip makes the treated surface more matt. The application is exclusively recommended on light coloured supports and/or pastel paint.

CONSUMPTION

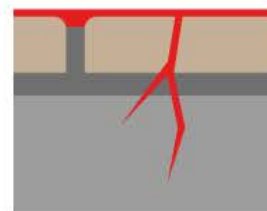

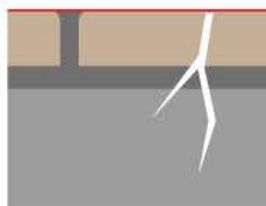

PRIMER 50gr/m²
FINISH 100gr/m²

SFERE (SPHERES)

Pre-dosed
pack for
0.750 ml

NB: Applying UMBRELLA on dark paint, even though efficiency is guaranteed against infiltrations, the aesthetic effect of the floor can be damaged, however the efficiency of the product is not affected. You are advised to conduct a test in advance on a small part of the surface. The manufacturer cannot be held in any way liable for aesthetic damage caused by the product.

Umbrella is different from traditional protective coatings because it creates a surface layer that adheres to the support to create a real barrier against infiltration. The high flexibility of the product guarantees exceptional results over time.

Umbrella Gloss Kit
- Umbrella Primer 0,375 lt,
- Umbrella Finish 0,750 lt

Umbrella NO SLIP Kit
- Umbrella Primer 0,375 lt,
- Umbrella Finish 0,750 lt
- Bag Umbrella Sfere (SPHERES) gr. 200.

DO-IT-YOURSELF

UMBRELLA by Atriafloor RAINFOOF RESIN FOR BALCONIES AND TERRACES

UMBRELLA is a special, water-based and transparent, thick resin - ideal for waterproofing balconies and terraces in ceramic, cotto, concrete, klinker, marble and other natural stone. Available in a gloss or non-slip variant (NON-SLIP - simply add the UMBRELLA Spheres to the finish).

APPLICATION

Carefully clean the surface to treat.

NB: Inadequate cleaning can cause the resin to detach.

Apply UMBRELLA Primer using a roller or brush.

Wait for the support to dry (min. 12 hours).

Apply UMBRELLA Finish in the pre-selected variant (Gloss or Non-Slip).

For the Non-Slip variant, mix the finish well with the Umbrella Spheres before application. You are advised to apply the product with a short-haired roller.

Wait for the product to dry (min 12 hours).
